

RAGUL S

Backend Developer

Chennai, India • +91 6379393146 • sankarrahul7373@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Backend Developer with 1+ year of professional experience specializing in Python, Django, Django REST Framework (DRF), PostgreSQL, and RESTful API development. Proficient in designing, developing, and maintaining scalable backend applications with a strong focus on performance, security, and maintainability. Experienced in building robust APIs, implementing authentication and authorization mechanisms, designing efficient database schemas, integrating third-party services, and optimizing application workflows. Passionate about developing high-quality, scalable systems and continuously learning modern backend technologies and engineering practices.

WORK EXPERIENCE

Backend Developer — Emayam Technology | Chennai, India

June 2025 – Present

- Developed and maintained scalable backend applications using Python, Django, Django REST Framework (DRF), and PostgreSQL, supporting business-critical web platforms and enterprise solutions.
- Built JWT-based authentication and role-based access control (RBAC) systems, strengthening application security and user access management.
- Built a reusable Dynamic Fields adopted across multiple modules, significantly accelerating feature development and reducing repetitive implementation work.
- Developed a production-ready Employee Monitoring System Agent with secure login, background processing, and centralized activity reporting capabilities.

CORE SKILLS

Languages & Frameworks: Python • Django • Django REST Framework (DRF) • RESTful APIs

Databases: MySQL • PostgreSQL • Database Design

Backend Expertise: API Integration • Workflow Automation • RBAC • JWT • Celery • Performance Optimization

Tools: Git • GitHub • Postman • VS Code • Debugging & Troubleshooting

PROJECTS

Focult – Employee Monitoring Platform Stack: Django, PostgreSQL, DRF, JWT, Python, Celery, Git

- Developed RESTful APIs and backend modules for real-time employee monitoring — covering web history, app usage, keystrokes, screenshots, screen recording, and file transfers for 500+ endpoints.
- Designed and implemented a generic, reusable backend architecture that allowed dynamic field configurations to be easily extended and integrated across multiple business modules with minimal code duplication.
- Built JWT authentication and RBAC for admin and employee roles; focused on low-latency processing, data privacy, and scalable architecture.
- Developed PDF and Excel reporting solutions, automating business reporting workflows and reducing manual effort for operational teams.

Neem E-Commerce Platform Stack: Django, PostgreSQL, DRF, Python, Git

- Developed RESTful APIs for product catalog management, inventory tracking, order processing, customer management, and payment workflows.
- Implemented JWT-based authentication and role-based authorization for secure access management.
- Built inventory management modules to track stock availability and product updates in real time.
- Integrated Razorpay payment gateway to facilitate secure digital transactions.
- Optimized database structures and API performance, reducing average response times by 35%.
- Implemented reporting and analytics features to support business decision-making and operational monitoring.

EDUCATION

Master of Computer Applications (MCA)

2022 – 2024

Srinivasan College of Arts and Science, Perambalur | CGPA: 7.2

Bachelor of Computer Applications (BCA)

2019 – 2022

Srinivasan College of Arts and Science, Perambalur | CGPA: 7.2

Python Full Stack Development

Jul 2024 – Dec 2024

Besant Technologies (Course + Internship)
